BIO

Fabrizio Conte was born in the millenarian city of Rome in January 1979. He is a professional in digital, video and photographic images. He works mainly with Reflex and Videoreflex systems. He gained experience as a machine operator of Panasonic P2 systems, Canon Cinema C Series. Love for images was born at university, studying history of art. Turning for the Capitoline museums, he soon matured a passion for figure and light. He studies all the evolution of the history of painting, from the Renaissance to today, deepening his studies on cinema and photography. He works hard and buys his first camera, with which he immediately shoots two short films. Not satisfied with the results, he understands that he has to go back. He left the video world for seven years to devote himself exclusively to photography. After several photographic experiences, he decided to return to the world of moving images and enrolled in the course of director of photography at the Academy of Cinema in Bologna, held by the Dop Mauro Marchetti. http://www.imdb.com/name/nm0545578/?ref=fn_al_nm_1

At this point he graduated with honors, he tackles the first work experience, acting as an operator for the streams of Guido Fiandra in the municipal theaters of Bologna and Modena. At the same time he participates in low-budget projects, such as short films and online contests. Driven by his passion for music, he begins to shoot the first videoclips. In 2013 he puts his head in order and gets married. The following year he founded his studio of "video-photographic" productions, finally combining his two passions.
